## Rolling Plan for Malaysia

Basic Policy i) To establish a good relationship as cooperation partners, and ii) to promote regional cooperation in the Asia region

Priority Area 1	Supporting a balanced development towards Malaysia becoming a high-income nation											
	[Background and Current Situation] The 12th Malaysia Plan (2021-2025) has three pillars: revitalising the economy: strengthening security, welfare and inclusiveness: and pursuing sustainability. Its policy agenda will concentrate on developing human resources, accelerating technology adoption and innovation, expanding connectivity and strengthening transport infrastructure and public services to achieve these goals. In September 2023, a mid-term review of the 12th Malaysia Plan (2021- 2025) was conducted, outlining the following themes for the future: (1) strengthening sustainability, (2) developing a prosperous society and (3) becoming a high-income country. In particular, to achieve the goal of becoming a high-income country, the government will focus on industries with high value-added and growth potential (digital technology, electrical and electronics, agriculture and rare earths), as well as strengthening SMEs and promoting high-level human resource development.										an resource od, energy and halal tiatives to deal with tion of the socially vsian experts on Japan etween urban and rural promote Grass-Roots
